OBJECTIVE

Final-year Computer Science student with hands-on experience in Python, SQL, and machine learning fundamentals, with a strong foundation in programming, problem-solving, and analytical thinking. Seeking a Trainee Software Engineer role to apply technical skills and contribute to reliable and scalable software solutions.

EDUCATION

Ajay Binay Institute of Technology, Odisha *2023 - Present*
B.Tech in Computer Science and Engineering | CGPA: 8.93

Tetrahedron Higher Secondary School, Odisha *2021 - 2023*
Higher Secondary Education – Science Stream | Percentage: 85.66%

SKILLS

Programming languages: Python, SQL
Libraries: Pandas, Matplotlib, Scikit-learn
Core Concepts: OOP, DBMS, Machine Learning Fundamentals
Database & Tools: MySQL, MS Excel, Git, VS Code, Jupyter Notebook

INTERNSHIPS

AI & Machine Learning Intern – Edunet Foundation |AICTE & IBM SkillsBuild *Dec 2025 – Jan 2026*

- Completed a 6-week AI & Machine Learning internship with hands-on training in Python, data preprocessing, and model development.
- Worked on real-world datasets to understand data patterns and apply basic machine learning techniques.
- Performed data analysis and visualization tasks to interpret results and communicate findings.

Data Analytics Intern – CTTC, Bhubaneswar *Jun 2025*

- Worked with Excel and Python to organize and analyze datasets, helping convert raw data into meaningful information.
- Created interactive dashboards and reports to present trends, comparisons, and key performance indicators in a clear format.
- Applied data visualization techniques to interpret results and communicate findings effectively.

PROJECTS

Global Unemployment and Economic Trend Analysis | GitHub Link

Tech Stack: Python (Pandas, Matplotlib, Seaborn, Scikit-learn), GitHub

- Analysed GDP growth, total unemployment, and youth unemployment trends across 7 countries using World Bank data (2017–2024).
- Performed data cleaning, exploratory data analysis (EDA), correlation analysis, and data visualization to identify key economic and employment patterns.
- Conducted trend analysis and estimated India's unemployment trend for 2025–2030 using a Linear Regression model.

ShopEase E-Commerce Executive Decision Support System | GitHub Link

Tech Stack: MySQL, SQL, Microsoft Excel, GitHub

- Cleaned, profiled, validated, and analyzed e-commerce data using SQL/MySQL, applying joins and aggregations to derive sales, customer, product, seller, payment, and review insights.
- Built an Excel Data Model and 4 interactive dashboards — Executive, Sales, Customer, and Product — using PivotTables, Slicers, and Timeline filters to track key business KPIs and trends.
- Developed a rule-based Decision Support layer that dynamically converts business metrics into Priority → Recommended Action → Expected Impact.
